## YOUR PATIENTS NEED EFFECTIVE RELIEF QUICKLY.

**F**our out of five (80%) American adults experience back and neck pain sometime during their lives. Millions of Americans suffer from chronic back and neck pain and the lost mobility it causes.

Back pain is one of the most common (and most costly) ailments in our society. The cost of treating back problems, time lost from work, insurance, therapy and surgery runs into the billions of dollars.

Back and neck pain can be simple nuisances. Or they can be quite disabling. Either way, REHABILITY can help your patients tremendously. Our experienced, highly trained, skilled multi-disciplinary rehab team is dedicated to relieving back and neck pain and getting your patients back to their life again.

We help patients overcome their back and neck problems and avoid future problems through a variety of hands-on manual therapies, including:

- Manual orthopedics
- Joint mobilization
- Soft-tissue manipulation
- Myofascial release

- Neural mobilization
- Muscle energy
- Stress reduction
- Massage therapy
- Personal exercise programs

We have vast expertise and experience in pain relief and rehabilitation for all kinds of back and neck injuries. Patients are also referred to us with a variety of sports-related and work-related back injuries, degenerative disc problems and neck pain. We always put your patients first. In fact, no other spine and sports medicine rehab facility offers patients as many value-added services and amenities as REHABILITY.

The medical, physical therapy and chiropractic professionals at REHABILITY have helped many back and neck pain sufferers. There's an excellent chance we can help your patients, too. Call us and take advantage of the most advanced, experienced, complete and compassionate back and neck care available. We welcome and encourage your referrals.
